# HONEYWELL

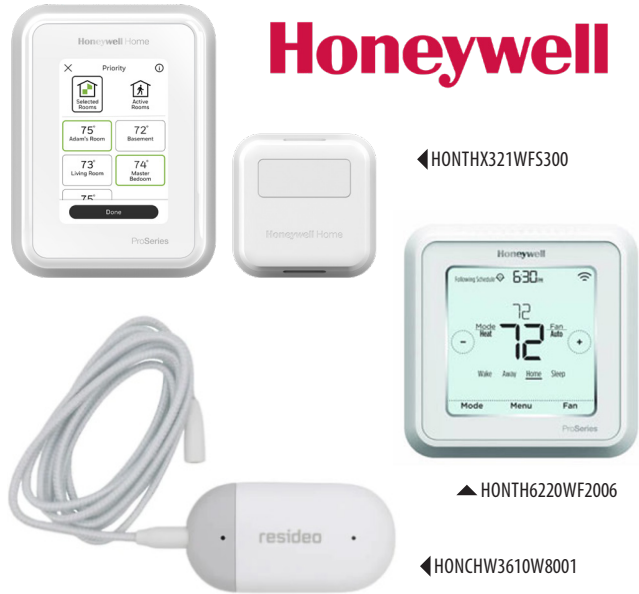

## WI-FI THERMOSTATS AND LEAK/FREEZE SENSORS

Combine thermostats and leak sensors in the Honeywell Home app for quick and convenient control and monitoring. Beyond simply controlling thermostats, the app lets you set schedules, geofencing rules, and even configure alerts from devices. The leak sensor sends alerts to app users when there is a leak, or based on high or low temperature or humidity. Thermostats also send temperature and humidity alerts.

# GRANDSTREAM NETWORKING

## A COMPLETE LINEUP OF NETWORKING PRODUCTS WITH CLOUD MANAGEMENT INCLUDED

Grandstream has your networking needs covered with routers, switches, and access points that can all be managed from one cloud portal and app. Simply log into your account and create a new network, then add all the Grandstream devices to it. Use the cloud to name devices, set up Wi-Fi networks, and even dig into details like channel selection, radio power, VLANs, and so much more. You can even set up the network and add all the devices to it in advance. Once the devices power up and get access to the internet they will automatically provision themselves based on the configuration and settings you loaded.
